

# Consumer Products

For the consumer market, we produce reusable desiccants for e.g. your car, caravan, bathroom, attic, shed and even your safe.

[View online](#) →

## 01 Applications

We have the right product for every application; available sizes include 500, 750 and 1,000 grams. The largest of these can absorb circa 800 millilitres of water.

## 02 Technical information

### The desiccants are reusable

When the desiccant is saturated and cannot absorb any more moisture, you can easily prepare the product for reuse by drying it in the microwave. Read the instructions of the product packaging for more information.

### Selling under your own label

Although it is not possible to purchase desiccants for private use from us directly, we have a network of national and international resellers. If you wish, we can print your company name and logo on our desiccants for the consumer market. One of the clients for whom we do that is the ANWB.

### Price on request

Product	Product number	Absorption capacity	Qty. per box
Multi Dehumidifier 500 gr	CR0500	approximately 400 ml	24
Car Dehumidifier 1000 gr	CR0001	approximately 800 ml	12
