- Food supplements
- Pharmaceutical products
- Camera or photographic equipment
- Cosmetics
- Diagnostic products
- Veterinary pharmaceutical products

02 Technical information

DDC offers a full line of silica gel desiccants for the food and pharmaceutical industries. Our silica gel desiccants are available in two variants: one with a fleece cover and the other with a Tyvek cover. Tyvek is a tear-, dust- and liquid-proof material that is permeable to water vapour, making it suitable for use in the food sector.

The product can be added in the form of individual bags, but it is also available on a roll for easy integration into your automated packaging process. Our Silica Gel Tyvek bags are FDA approved and meet the requirements of EU regulations EC 1935/2004 and EC 450/2009, which means they are food-safe. We have this tested by the independent institute SGS/Fresenius.

Product	Product number	Qty. per box	Total Qty.
Silica Gel Tyvek 0,5 gr	SGT000	15 x 1.000	15000
Silica Gel Tyvek 1 gr	SGT001	10 x 1.000	10000
