01 Applications

Silica Gel Paper can be used in many different environments. We offer solutions for e.g.:

- Electronics
- Circuit boards
- Optical products
- Telecommunication equipment
- Medical equipment
- Instruments
- Museum storage
- Bulk chemicals

02 Technical information

Protect your products against moisture and condensation during storage, transport and inside their packaging. Silica gel non-food desiccant bags offer a wide range of possible applications. Think of e.g. adding a bag to steel or metal, electronics, with camera or photographic equipment or inside your packaging materials.

Silica gel can absorb circa 30% of its own weight in moisture and is available in two variants. The Silica gel non-food with white granules, available in bags from 0.5 to 1,000 grams.

The Silica gel non-food desiccant bags with added orange granules (Silica gel Aihua). This bag contains an indicator, the orange granules, which change to a blue-green colour when they are saturated.
